VENDO

Vendo's is a smart vending machine offering both can and bottle products. The machine is controlled by a thermostat which forces its air-cooling mechanisms to keep the SuperStack at optimum temperature, ensuring cans and bottles are dispensed at a refreshingly cool temperature. Each internal column has its own individual vend motor for a fast vend time.

VENDO KEY FEATURES

- Simple one-press selection process
- Energy management by real-time clock
- Product pre-cooling before vend
- Foamed cabinet insulation
- Individual vend motors
- Anti-theft device
